The 3 of us. From Midnight to 2.a.m.

Stephan Blumenschein

The 3 of us. From Midnight to 2.a.m. is an architectural intervention introducing a poetic response to the given exhibition space. [simultaneously the intervention] addresses the spatial organisation of the opening in bb15 and how it informs and orchestrates our encounter and exchange throughout the evening.

the [door], a reoccurring element in the work, operates as a conceptual and a physical conjunction of these different notions.
